

SANFORD AND SON-CHANGE 3

Fred Sanford

Processing Date: _____

On _____, the EES follows up on a worker alert and contacts Fred's doctor. The doctor states that Fred is still in the NF, but is recovering well and he plans to release him next week. In talking with the NF, the EES worker ascertains that the NF is already doing discharge planning.

Later that month...

It is now _____, You receive a phone call from Lamont Sanford reporting to you that Fred suffered a stroke 2 days ago. The stroke is serious. Besides being almost completely paralyzed on the left side of his body, Fred is suffering from cognitive impairment and aphasia. Lamont says that the prognosis is not good and that the doctor says Fred will have to stay in the NF. The doctor does not think Fred will ever be able to return home.

On _____, you receive the following information:

- An IM-3161 from the AAA case manager saying the HCBS case is closing effective _____. The case manager has noted in the comments section that a CARE assessment was completed on _____ and Fred meets the NF LTC threshold.

Take the appropriate action on Fred's case. Process through_____.
